

# INDEX TO VOLUME 102

## New scientific names are in bold face.

- Abbott, J. Richard and Walter S. Judd. Floristic inventory of the Waccasassa Bay State Preserve, Levy County, Florida. 439-513
- Acer platanoides* 332-354; *saccharum* 332-354
- Adirondacks 250-276
- Aegagropilous *Desmarestia aculeata* from New Hampshire. 202-207 (New England Note)
- Algae, marine 202-207
- Andes, *Verbesina* 129-141
- Angelo, Ray and David E. Boufford. Atlas of the flora of New England: Monocots except Poaceae and Cyperaceae. 1-119
- ANNOUNCEMENT:  
New England Botanical Club Graduate Student Research Award 380
- Aquatic plants 13-14, 25-32, 61-64, 96-115
- Aquilegia canadensis* 308-326
- Aralia racemosa* 308-326
- Atlantic coastal plain shrubs 518-522
- Atlas of the flora of New England: Monocots except Poaceae and Cyperaceae. 1-119
- Atriplex*: subgeneric novelties, sectional and subsectional novelties, and new varietal combinations 415-427
- Australia, *Oleandra* 428-438
- Bahamas, pollination 392-414
- Beaver (*Castor canadensis*) 175-197
- Biological invasions 332-354
- Birds, pollination reliability, and green flowers in an endemic island shrub, *Pavonia bahamensis* (Malvaceae). 392-414
- Boates, J. Sherman 518-522
- Bolivia, *Genlisea* and *Utricularia* 217-224
- BOOK REVIEWS:  
Aquatic and Wetland Plants of Northeastern North America. Volume 1. Pteridophytes, Gymnosperms, and Angiosperms: Dicotyledons; Volume 2. Angiosperms: Monocotyledons. 523-526
- Guide to the Algae of New England as Reported in the Literature from 1829-1984, Parts I and II. A. 225-226
- Thoreau's Country: Journey through a Transformed Landscape. 227-229
- Boufford, David E. 1-119
- Breeding system 392-414
- Burk, C. John 154-174
- Callery pear 361-364
- Callery pear (*Pyrus calleryana*—Rosaceae) naturalized in North Carolina. 361-364 (Note)
- Caltha palustris* 308-326
- Caryophyllaceae 214-216
- Centennial Symposium: The dynamics of the New England flora. 241-360
- Chenopodiaceae, *Atriplex* 415-427
- Chloromonas* spp. 365-372
- Chlorophyta 365-372
- Clethra alnifolia* 518-522
- Climate and vegetation 246-247, 248-249
- Clonal plant, *Maianthemum canadense* 142-153
- Closing remarks. 355-360
- Cogbill, Charles V. Vegetation of the presettlement forests of northern New England and New York. 250-276
- Columbia, *Verbesina* 138-140
- Connecticut 1-119
- Connecticut River 154-174
- Conservation 243-245, 299-331
- Corynephorus canescens* 208-209
- Crow, Garrett E. 217-224
- Dawes, Clinton J. 202-207

- Dedication 241-242  
*Desmarestia aculeata* 202-207  
 Distribution maps, New England monocots 33-115; *Chloromonas* 367  
 Drayton, Brian and Richard B. Primack. Rates of success in the re-introduction by four methods of several perennial plant species in eastern Massachusetts. 299-331  
 Drew Forest Preserve, Madison, NJ 332-354  
 Duval, Brian and Ronald W. Hoham. Snow algae in the northeastern U.S.: Photomicrographs, observations, and distribution of *Chloromonas* spp. (Chlorophyta). 365-372 (New England Note)  
 Dwyer, Marc 332-354  
 Dynamics of the New England flora. The, 241-360  
  
 Ecuador, *Verbesina* 129-138  
 Edge effects 332-354  
 Edible fruit, *Jaltomata* 385-391  
 Elderkin, Mark F. 518-522  
 Endangered species 198-201, 210-213  
 Endemic plant, pollination of 392-414  
  
 Ferns, *Oleandra* 428-438  
 Fifty years of change in *Rhodora* and the New England flora. 277  
 First records of a European moss, *Pseudoscleropodium purum*, naturalized in New England. 514-517 (New England Note)  
 Floodplain vegetation 154-174  
 Flora of New England, dynamics 241-354; specific discussions 250-276, 280-298  
 Flora, New England 1-119; swamp forest 154-174; beaver wetlands 175-197; Florida 439-513  
 Florida 439-513  
 Floristic inventory of the Waccasassa Bay State Preserve, Levy County, Florida. 439-513  
 Forest ecology 332-354  
 Foster, David R. Linking the deep and recent past to the modern New England landscape. 278-279  
  
 Ganger, Michael T. Do reproductive history traits relate to seed maturation in a clonal herb? 142-153  
*Genlisea guianensis* 217-224  
 Globally imperiled species 198-201  
 Globally rare species 210-213  
 Green flowers 392-414  
  
 Haines, Arthur. Rediscovery of *Symphyotrichum anticostense* in the United States. 198-201 (New England Note)  
 Hammond Woods, Newton, MA 308-319  
*Hebecladus sinuosus*, transferred as *Jaltomata sinuosa* 385-391  
*Hedyotis caerulea* 308-326  
 Hehre, Edward J. 202-207  
 Heliantheae 129-141  
 Herbaceous flora 154-174  
 Hevner, Scott J. 385-391  
 Hill, Nicholas M., J. Sherman Boates, and Mark F. Elderkin. Low catchment area lakes: New records for rare coastal plain shrubs and *Utricularia* species in Nova Scotia. 518-522 (Note)  
 Historical ecology 250-276, 280-298  
 Hoham, Ronald W. 365-372  
 Holland, Marjorie M., C. John Burk, and David McLain. Long term vegetation dynamics of the lower strata of a western Massachusetts oxbow swamp forest. 154-174  
 Hudson, W. Donald Jr. Closing remarks. 355-360  
 Hummingbird pollination 392-414  
  
 Illinois 214-216  
 Immigration and expansion of the New England flora. 280-298  
 Implications of post-glacial changes in climate and vegetation on the flora of the White Mountains, New Hampshire. 248-249  
 Introduced species 280-298, 514-517  
 Invasive species 332-354

- Island pollination 392-414
- Jacobson, George L. Jr. Post-glacial changes in vegetation and climate in northern New England. 246-247
- Jaltomata* 385-391; *hunzikeri*, sp. nov. 385-388; *sinuosa*, comb. nov. 388-390; *dentata* 390
- Judd, Walter S. 439-513
- Juncaceae 9-13, 49-60
- Kaunzinger, Christina K. 332-354
- Leiva G., Segundo 385-391
- Lentibulariaceae 217-224

- Miller, Norton, G. First records of a European moss, *Pseudoscleropodium purum*, naturalized in New England. 514-517 (New England Note)
- Mione, Thomas, Segundo Leiva G., Neil R. Smith, and Scott J. Hevner. A new species, a new combination, and new synonymy for South American *Jaltomata* (Solanaceae). 385-391
- Myth of the resilient forest: Case study of the invasive Norway maple (*Acer platanoides*). The, 332-354
- Naturalized species, North Carolina 361-364; New England 514-517
- NEBC Meeting News 120-125, 230-236, 373-379, 529-531
- Nectar production 392-414
- Nesom, Guy L. Callery pear (*Pyrus calleryana*—Rosaceae) naturalized in North Carolina. 361-364 (Note)
- New Books 527-528
- New England flora 1-119, dynamics of 243-354, naturalized species 514-517
- New Hampshire 1-119, 202-207, 210-213, 248-249, 250-276
- New Jersey 332-354
- New records for rare coastal plain shrubs and *Utricularia* species in Nova Scotia. 518-522 (Note)
- New records for *Scirpus ancistrochaetus* in New Hampshire. 210-213 (New England Note)
- New records, Maine 198-201, 208-209; New Hampshire 210-213; Bolivia 217-224; New England 514-517; Nova Scotia, Canada 518-522
- New species of *Verbesina* from the northern Andes (Heliantheae; Asteraceae). Five, 129-141
- New species, a new combination, and new synonymy for South American *Jaltomata* (Solanaceae), A. 385-391
- New species, South America, *Verbesina* 129-141; *Jaltomata* 385-391
- New York 250-276
- Nomenclatural proposals in *Atriplex* (Chenopodiaceae). 415-427

- Non-indigenous plants 280–298  
Non-native plants 280–298; 361–364; 514–517  
North Carolina 361–364  
Northeastern U.S. 365–372  
Northern hardwood forest 250–276, 332–354  
Norway maple (*Acer platanoides*) 332–354  
Notes on the Lentibulariaceae in Bolivia: A new genus record (*Genlisea*) for the country, with two additional species records in the genus *Utricularia*. 217–224 (Note)  
Nova Scotia, Canada 518–522  
*Oleandra* 428–438; *neriiformis* 430–433; *Wernerii* 433–434; *musifolia* 434; *Wallichii* 434–436; *undulata* 436; *Sibbaldii* 436–437; key to the Asian, Australian, and Pacific species of *Oleandra* 429–430  
Oleandraceae 428–438  
Opening remarks: Plant conservation globally and locally. 243–245  
Orchidaceae 19–25, 80–96  
Orchids 19–25, 80–96  
*Osmorhiza claytonii* 308–326  
Pacific, *Oleandra* 428–438  
Panero, José 129–141  
*Pavonia bahamensis* 392–414  
Phenology of flowering 392–414  
Phytogeography 439–513  
Plant biogeography 250–276  
Plant communities, Florida 439–513  
Plant conservation globally and locally 243–245  
Pollen/ovule ratio 392–414  
Pollination 392–414  
Population re-establishment 299–331  
Post-glacial 246–247, 248–249  
Post-glacial changes in vegetation and climate in northern New England. 246–247  
Potamogetonaceae 25–29, 97–108  
Presettlement vegetation 250–276  
Primack, Richard B. 299–331  
Proprietary town 250–276  
*Pyrus calleryana* 361–364  
Rare plants 518–522  
Rates of success in the reintroduction by four methods of several perennial plant species in eastern Massachusetts. 299–331  
Rathcke, Beverly J. Birds, pollination reliability, and green flowers in an endemic island shrub, *Pavonia bahamensis* (Malvaceae). 392–414  
Raven, Peter H. Opening remarks: Plant conservation globally and locally. 243–245  
Rediscovery of *Symphyotrichum antiochense* in the United States. 198–201 (New England Note)  
Reintroduction methods 299–331  
Reproductive biology, *Maianthemum canadense* 142–153  
Reproductive history traits relate to seed maturation in a clonal herb? Do, 142–153  
Restoration ecology 299–331  
Rhode Island 1–119
